

Holly Keir is a researcher in the Chalmers Lab at the University of Dundee, in Scotland, focusing on neutrophil function and the microbiome in Bronchiectasis and COPD. In 2016, Holly obtained a BSc (Hons) in Biological Sciences at the University of Dundee, before joining the Chalmers Lab as a research technician for 12 months. Following this, Holly began a PhD exploring the role of Neutrophil Extracellular Traps in Bronchiectasis and COPD, which she is in the process of completing. In September 2020, Holly was appointed the Assembly 10 Under-40 Representative to the Early Career Members Committee for the European Respiratory Society.
